

## **Intensive #2 – Pediatric Intensive**

The session will review various process changes we have made in our social work department over the last two years designed to increase staff participation in day to day management of the department. The presentation will include the implementation of staff lead workgroups, our clinical and administrative supervision model, our contingency social work model, and our staff meeting model. The audience is intended for the pediatric social work group.

### **Intensive Objectives:**

- Participants will be able to identify/discuss elements of a participatory management model for a hospital social work department.
- Participants will be able to analyze/discuss the benefits and problems associated with participatory management.
- Participants will analyze their own management models in their departments and learn from our experiences.
